The two 3" meters at City Railway Station have gone out of order spare parts are not available in India and local repairs have not given any proper results. These meters have also become very old and worn being nearly 30 years or more in service. At present there is reason to believe that consumption is increasing. Hence the charging of previous average consumption is likely to affect the revenue. Hence the meters require to be renewed early.

So also in the Inter College and the Agricultural Office the 2" meters need replacement. In the case of Central Jail the 2½" meter has become very old and has gone out of order.

All these concerns are likely to fetch better revenue to Municipality with renewed meters.

The estimate is based on quotations got in May and June 43. But unless sanctioned immediately new meters prices may go up.

The cost is to be met by Municipality as these are concerns located within Municipal Limits and Revenues are credited to municipality.
